

“ An Equal Opportunity Employer ”

RECRUITMENT OF GRADUATE TRAINEES

Sable Chemical Industries Limited, the only manufacturer of Ammonium Nitrate fertilizers in the country, is located in Kwekwe, central Zimbabwe. It employs about 300 people and has a rated capacity to produce 240 000 tonnes of Ammonium Nitrate per annum. Sable's Ammonium Nitrate fertilizer and other Chemical products are supplied largely to the domestic markets.

As part of its manpower planning, Sable is seeking to recruit graduate trainees for two-year comprehensive and career rewarding post-graduate training programmes in the following disciplines:

- Electrical Engineering
- Safety, Health and Environment

Candidates should meet the following criteria:

Minimum Qualifications.

- A first Degree in Electrical Engineering with a heavy current bias or an equivalent qualification for the Electrical trainee and an Environmental Science degree or an equivalent qualification in a relevant discipline for the SHE trainee, both from recognised universities with at least an Upper Second Class pass.
- Exposure to a heavy manufacturing environment will be an added advantage.

Other Key Attributes.

- Excellent communication and interpersonal skills
- Good analytical skills
- Flexibility and ability to work under pressure

Written applications together with detailed Curriculum Vitae and certified copies of academic and professional qualifications including birth certificates, should be addressed to: -

The Human Resources Manager
